European Journal of Operational Research 66 (1993) 403–404
North-Holland

Contents Volume 66

1 Flexible manufacturing systems: An investigation for research and applications (*Invited Review*)
A. Gunasekaran, T. Martikainen and P. Yli-Olli
27 Determining market response functions by neural network modeling: A comparison to econometric techniques
H. Hruschka
36 Fuzzy nonlinear regression analysis of dose–response relationships
A. Bárdossy, I. Bogárdi and L. Duckstein
52 Diversification under yield randomness in inventory models
M. Parlar and D. Wang
65 A sequencing problem in the weaving industry
M.H. Al-Haboubi and S.Z. Selim
72 Characterization of desirable information processing and decision making systems in organization
K. Kijima
89 On repetitive control and the behaviour of a middle-aged consumer
J.B. Krawczyk and G. Karacaoglu
100 A multiperiod planning model for communications satellites
A. Dutta and D.V. Rama
113 Optimal bus services on express basis in the case of balking and reneging
R.R. Sharma, R.C. Rai and A. Mishra
124 Analyses of spares for new weapons systems using Markov chains
C.R. White
135 Batching policies for a repair shop with limited spares and finite capacity
R.C.H. Chua, G.D. Scudder and A.V. Hill
148 Bicriteria network flow problems: Integer case
H. Lee and P.S. Pulat
158 OR Software
ORSEP – Operations Research Software Exchange Program, *H.W. Hamacher (ed.)*
HOPDM – A higher order primal–dual method for large scale linear programming, *A. Altman and J. Gondzio*

Special issue on Strategic Planning of Facilities

161 In search of a valid view of model validation for operations research
M. Landry and M. Oral
168 Revisiting the issue of model validation in OR: An epistemological view
R. Déry, M. Landry and C. Banville
184 Decision science or decision-aid science?
B. Roy
204 A foundational concept of science appropriate for validation in operational research
H.J. Miser
216 The facets of the modeling and validation process in operations research
M. Oral and O. Kettani
235 Modeling muddles: Validation beyond the numbers
J.H. Smith
250 Model accreditation: A rationale and process for determining a numerical rating
S.I. Gass

259 Minimizing variation of production rates in just-in-time systems: A survey (*Invited Review*)
W. Kubiak
272 A planning model for determining the optimal location and size of traffic centers: The case of Dammam Metropolitan, Saudi Arabia
T.N. Al-Faraj, A.S. Alidi and A.A. Al-Ibrahim
279 Optimal bin location and sequencing in printed circuit board assembly
L.R. Foulds and H.W. Hamacher
291 Multicriteria facility layout problem: An integrated approach
J.S. Shang
305 A Lagrangian heuristic for the capacitated plant location problem with single source constraints
R. Sridharan

0377-2217/93/$06.00 © 1993 – Elsevier Science Publishers B.V. All rights reserved

313 Incorporating vehicle routing into the vehicle fleet composition problem
S. Salhi
331 A parallel route building algorithm for the vehicle routing and schedulingproblem with time windows
J.-Y. Potvin and J.-M. Rousseau
341 Coordinated transportation systems: An alternative approach to traditional independent systems
H.M. Baker, L.S. Franz and J.R. Sweigart
353 On representatives of multi-index transportation problems
W. Junginger
372 Competitive location on a network
A. Bauer, W. Domschke and E. Pesch
392 Efficient chains in a network with time–cost trade-off function on each arc
K.P.K. Nair, V.R. Prasad and Y.P. Aneja
403 Contents Volume 66
